

**Scrapbooking Class
August 24th at 10am
at the Q.B. Boydston Library**

Do you own a camera or smartphone? If yes, then you are a photographer! You are also your family's historian and it's up to you to save those memories. We are taking millions of photos, more now than at any point in history, but they're left to languish in a system's storage system until the owner deletes them to make room for more or they're being lost with computer or external hard drive crashes!

Are you interested in Scrapbooking but you aren't sure where to start? Do you have two hours to make your own fun little album to share with family and friends? As an Independent Advisor with Creative Memories, I want to help you make sure your family's precious photos and memories live on for generations to come. I want to show you how fun it is to create simple scrapbooks to share with friends and family.

Beginner's Class is \$15.00 per person and includes an 8x8 Creative Memories Paper Album, adhesive, and some decorative elements to embellish your album. The theme for this album will be Summer Memories. I'll have some trimmers and fun tools on hand to help you complete your album and some archival pens for journaling.

You'll just need to bring 15-20 4x6 photos that go along with the theme.

At the end of the class, you'll have a completed 8x8 Creative Memories Paper Album to take home with you.
